APRIL

ROCK GARDEN HINTS

YOU may take some of the salt hay or leaf covering off gradually until spring is with us for good. After the mulch is removed, clean your rock garden thoroughly picking all dead leaves, cleaning each plant of last year's weak or decomposed growth. Weed with all your might, for April's weeding will enable you to rest and enjoy your garden in the months to follow. Press back firmly all plants that frost may have heaved. Top dress, especially the ground covers, rubbing a light compost amongst the growth ($\frac{1}{2}$ sand— $\frac{1}{2}$ leaf mold enriched with bone meal, sheep manure or wood ashes). If you are growing Alpines from seeds, keep a sharp lookout for damping off. If it starts, a little flour of sulphur sprinkled over the seedlings may check it. If not use "Same-san," the best preventive and curative in the market. Watch your watering. You may safely sprinkle wood ashes and bone meal, mixed, all over the rock garden. You'll be amply repaid. And do not forget to mail your order for new plants early enough to avoid disappointment. You will

PRIMULA AURICULA

also get better plants. Order plants for effect. Use several of a kind to make a show: Aubrietia, Alyssum, Arabis, Iberis, Phlox, Cerastium. Don't forget the dwarf evergreens. April is a good month to plant them.

See Special Offers on reverse side.

CHOICE PLANTS BLOOMING IN APRIL

Anemone Pulsatilla Rubra
Anemone Nemorosa
Anemone Nemorosa Flora Plena
Anemone Patens
Asarum Europeum
Corydalis Lutea
Draba Repens

 Bruckenthalia Spiculifolia
 Cornus Canadensis
 Leiophyllum Buxifolium Prostratum
 Pachystima Canbyi
 Vaccinium Vitis Idea

NOTICE: These offers are good only until April 30th

These collections are offered to the public at a reduced price for several reasons. Year by year a surplus accumulates, which has to be disposed of. Usually this is wholesaled. We prefer to offer it to our friends and patrons at sale prices. We both benefit by this trade, for folks learn to know rare and choice plants, creating thereby an increased demand. They also learn to know Mayfair plants and Mayfair policy which is that its success depends on the entire satisfaction of its clientele. Do not look at these offers as ordinary "Bargains." They consist of the standard stock and are packed and labelled with the utmost care. Remember that we want to be recommended by you to your friends.
